Le Moulin des Aravis - Rural holidays (A restored mill)

Extreme Kayak racing

Since 2002 in Pontboset is taking place the competition of extreme Kayak racing that it is valid for the Italian title. The course is very exacting because of slipways and spectacular waterfalls with 5° and 5° upper degree of difficulty.

The “Orrido del Ratus”

To see the “Orrido del Ratus” has been marked a pleasant footpath that leads from Capoluogo to Frontière along the Brenve torrent. A project named PIT AES – *Aggregation and development*-, approved thanks to the programme Leader +, have permitted the works of safety measures and the placing of some descriptive signs of the flora, the fauna and the geology of the territory. This project try to increase the torrential environment with its geologic and naturalistic characteristics such as the ravines and the gorges. The other torrential ravines, linked with this through a signalled track, are those of “Guillemore” in Fontainemore, the “Goilli dou Portset” in Champorcher and the ravine on the Ayasse Torrent in Hône.
